Washington Master Addressing Service (WAMAS)

- Set of data (address points, street centerlines and other information to support finding an address)
- Address locations are compiled into tools
- Local Government and DSHS, DOH, DOR
- [WAMAS Guide](#)

Value

- Consistent addresses helps citizens when getting services from state and county providers
- Collect once, use many times
- Save money by not using commercial products
- National participation/ compliance with addressing

Washington Imagery Acquisition

- Purchase high resolution statewide imagery
- Critical data, unstable funding
- GIT has identified this as needing more stable funding
- [OCIO - Geospatial Program Office](#)

Value

- Seamless imagery between state and county users
- Same base information to create streams, locate buildings (WAMAS data) and respond to emergencies
- Many rural counties can't afford it by themselves

17

State Interoperability Executive Committee (SIEC)

Information / Discussion

Alex Alben – SIEC Chair

Michael Marusich – Staff to the SIEC

March 13, 2018

18

SIEC Charter

Membership and committee responsibilities defined in RCW 43.105.331.

“Develop policies and make recommendations [regarding]. . . The interoperability of systems, taking into account both existing and future systems and technologies.”

Key SIEC Responsibilities

Recommend
Policy &
Standard

Coordinate state
licensed radio
frequencies

Coordinate
purchasing of
radio equipment

Promote
interoperability

Impacting

- Emergency communications
- First Net/One Net
- Groups in state not served by existing land mobile radio (LMR) network
- Spectrum allocation
- Wireless

Current SIEC Activities

Developing policy & underlying governance for approvals and reuse

Forming shared radio working group

Forming oversight on federal/state mandates

Refine and expand role of Statewide Interoperability Coordinator (SWIC)

Develop Tactical Interoperable Communications Field Operations Guide

SIEC – Activities

- RF Communications Policy and Standards Development
- Review and oversight of federally mandated and state agency originated radio regulatory compliance
- WSP Statewide Narrowband Project
- WSDOT / WADOC Statewide 800 MHz Rebanding Project (federal mandate)
- WSDOT 700 MHz Radio Procurement Project (agency initiated)

Working with:

- Recently appointed a Deputy SWIC – Michael Marusich, to assist Bob Schwent (SWIC) in the administration of SWIC responsibilities and reporting within Washington.
- Department of Homeland Security (DHS) / Office of Emergency Communications (OEC) - Interoperable Communications Technical Assistance Program (ICTAP)
- DHS/OEC to develop a certification process and repository for those completing COMU training programs in Washington.

Future

- Achieve savings through interoperability
- Educate members on new technologies
- Do better spectrum management

WA Department of Transportation Land and Mobile Radio System Replacement Project

Information / Discussion

March 13, 2018

Roger Millar, Secretary of Transportation

Keith Metcalf, Deputy Secretary of Transportation

WSDOT Land Mobile Radio System

- Overview
 - WSDOT owns and operates a statewide Land Mobile Radio (LMR) system. The system is over 20 years old and is no longer supported by the manufacturer.
 - RCW 43.105.331 requires the replacement system to meet all the interoperable requirements of the P25 standards.
 - LMR Project was included in the Connecting Washington new transportation revenue package.
 - Section 307, of the 2017-19 Transportation Budget, requires quarterly reporting to the Technology Services Board and requires increased interoperability, reuse and leverage existing infrastructure and meet multiple agency needs.
 - Written reports are to be provided monthly to the TSB unless the board requires or WSDOT requests a presentation.

WSDOT Land Mobile Radio System

- Overview – Current System
 - Provides day to day and emergency communications
 - Supports maintenance, traffic incident management, engineering and ferry operations
 - 136 remote radio sites statewide
 - Over 3500 mobile and portables
 - Current system partners: WADOC transport and WAEMD (campus communications)

- Overview – New System
 - Provides day to day and emergency communications, redundancy and resiliency
 - Supports maintenance, traffic incident management, engineering and ferry operations
 - 140 remote radio sites statewide
 - Over 3500 mobile and portables
 - New system partners: WADOC transport and EOC operations, WAEMD statewide operation, and Airlift Northwest

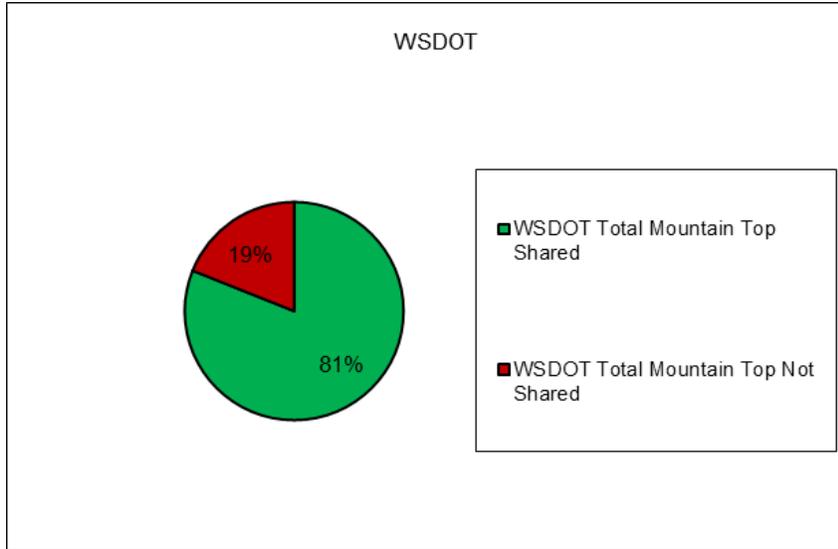

Schedule, Budget and Milestones

- Project implementation will take approximately three years to complete.
- Current estimated budget for project completion is \$37M.
- Will use a lessons learned approach and deployed in two WSDOT operational regional each year. This approach allows the project to apply lessons learned to the next region's design.
- Each region will have a Functional Acceptance Test Plan (FATP) and Coverage Acceptance Test Plan (CATP). These documents will include the metrics for regional acceptance.
- Draft schedule and milestones provided. Schedule will be updated after System Design Review.

| Project Schedule and Budget | | | | |
|-----------------------------|-----------------------------------|---------------------|--------|---------------------|
| 2015-17 Biennium: | | | | |
| FCC Applications | RPC Approval Letter | 2015-17 Biennium | Oct-17 | \$600,000 |
| 2017-19 Biennium: | | | | |
| Procurement | Contract Signed | Underway – Feb 2018 | | \$600,000 |
| Design | System Design Review Acceptance | Mar 2018 - May 2018 | | \$1,700,000 |
| Implementation - Pilot | Pilot – FATP Acceptance | May 2018 – Oct 2018 | | \$4,900,000 |
| Implementation - Pilot | Pilot – CATP Acceptance | May 2018 – Oct 2018 | | |
| Implementation - System | Final System Acceptance - Go Live | Nov 2018 – Dec 2021 | | \$29,235,317 |
| Total | | | | \$37,035,317 |

| Gate | Milestones | Ends | Deliverable (Artifact) |
|----------------|-----------------------------------|----------|---|
| Design | System Design Review | 3/23/18 | WSDOT approved system design review document |
| Design | System Design Acceptance | 4/27/18 | FATP and CATP updated and approved. |
| Pilot 1 | Pilot 1 Design Review | 5/7/18 | WSDOT approved detailed design review document |
| Pilot 1 | Pilot 1 Acceptance | 12/15/18 | FATP and CATP passing results document |
| Pilot 2 | Pilot 2 Design Review | 5/14/18 | WSDOT approved detailed design review document |
| Pilot 2 | Pilot 2 Acceptance | 1/8/19 | FATP and CATP passing results document |
| Implementation | NW Region Design Review | 12/22/18 | WSDOT approved detailed design review document |
| Implementation | NW Acceptance | 7/19/19 | FATP and CATP passing results document |
| Implementation | NC Region Design Review | 1/13/19 | WSDOT approved detailed design review document |
| Implementation | NC Acceptance | 7/27/19 | FATP and CATP passing results document |
| Implementation | SC Region Design Review | 4/29/19 | WSDOT approved detailed design review document |
| Implementation | SC Acceptance | 3/20/20 | FATP and CATP passing results document |
| Implementation | Oly Region Design Review | 5/7/19 | WSDOT approved detailed design review document |
| Implementation | Oly Acceptance | 6/12/20 | FATP and CATP passing results document |
| Implementation | SW Region Design Review | 6/5/20 | WSDOT approved detailed design review document |
| Implementation | SW Acceptance | 6/28/21 | FATP and CATP passing results document |
| Implementation | East Region Design Review | 5/12/20 | WSDOT approved detailed design review document |
| Implementation | East Acceptance | 6/18/21 | FATP and CATP passing results document |
| Implementation | Statewide System Final Acceptance | 12/30/21 | Steering Committee approved Go Live criteria document |

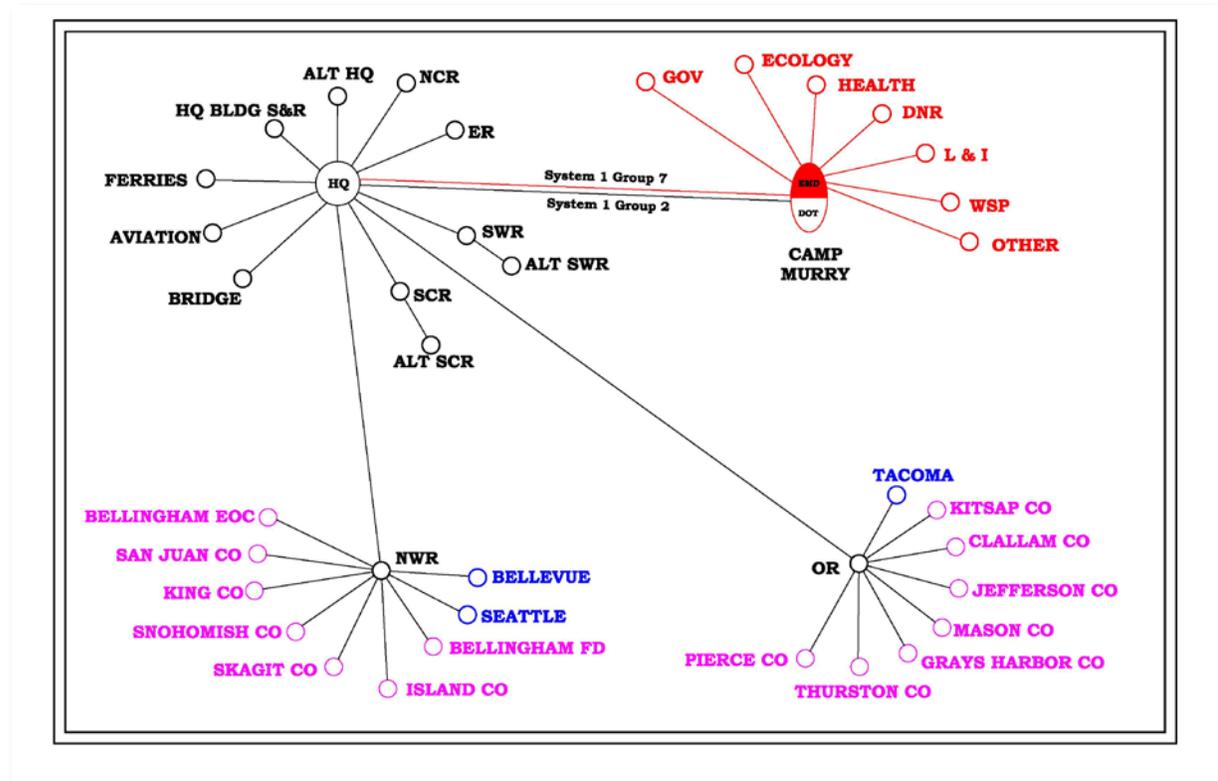

Share, Risks and Measurements

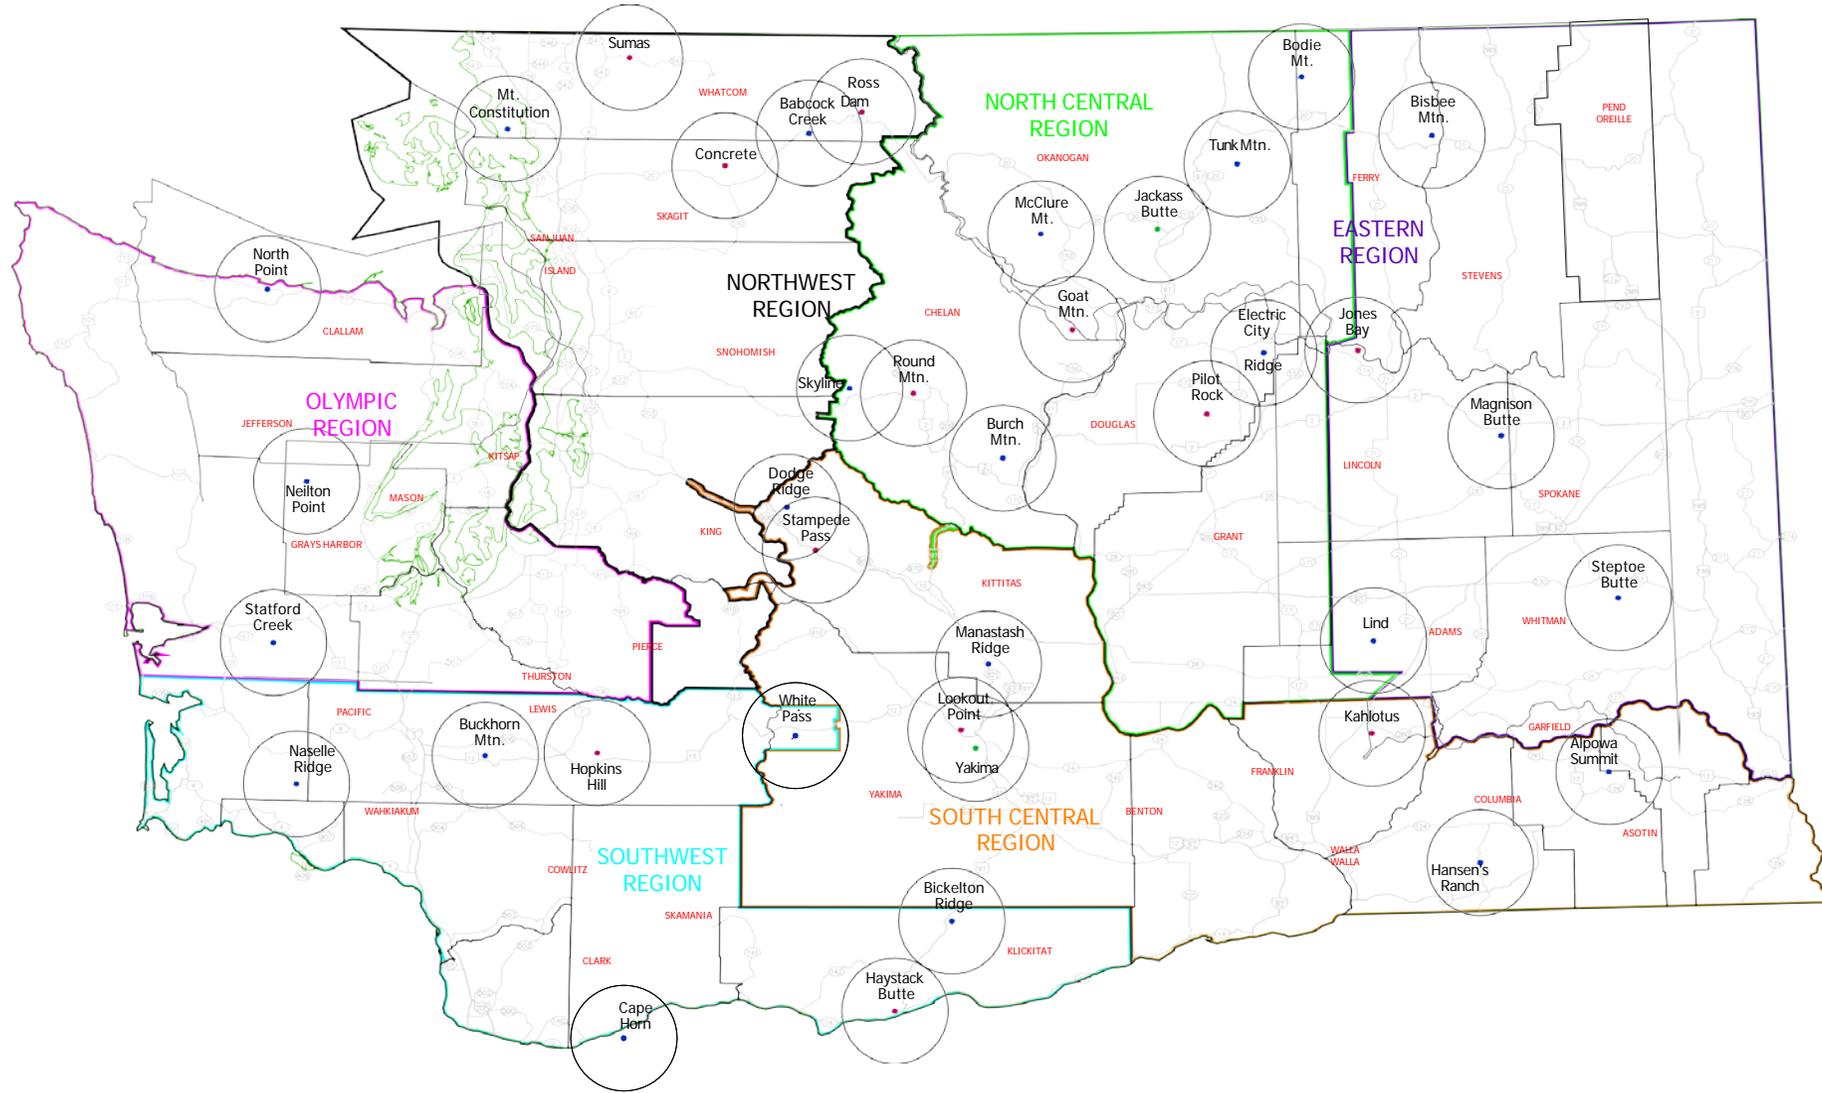

- Share, reuse and leverage existing infrastructure
 - WSDOT shares over 80% of the radio site locations with other State and Local agencies
 - New system reuses existing, towers, buildings, generators, microwave connections and other support equipment.
 - None of the existing LMR system can be reused
- Key Risks
 - Weather – Flexibility in the schedule
 - Commercial Leases – Start negotiations early
 - Staff Awareness – Use same tools in similar successful projects.
 - Project Duration and Scope Creep – RFP was written to provide a lessons learned approach, at final acceptance all regions will be normalized.
- System Performance Measurements
 - Provide 95% coverage per operational region and statewide, using existing sites, measured data, neighboring regions' sites.
 - Establish a Digital Audio Quality (DAQ) of 3.4.

Interoperability

- Increase State Agency Emergency Network (STAEN) to statewide operation – Improve COOP planning
- Continue to maintain Puget Sound EOC talk group, County and City capability to monitor WSDOT EOC Traffic and communicate with State EOC.
- Maintain DOC Bus traffic Statewide, Simplified code plug, single zone operation.
- Add DOC EOC talk group statewide
 - Mutual Benefit agreement
- Add Airlift Northwest talk group statewide
 - Shared or exchange of services.
- New system will have the capability of three ISSI connections.
- Provide WSP with use of WSDOT VHF licensed spectrum no longer needed, seven letters of authorization.
- Committed to 39 interoperable repeaters statewide, per Region 43 spectrum use.

Privacy Office Updates

Discussion

March 13, 2018

41

Privacy Legislative Update

- HB 2278 would designate privacy officers for each agency
- Net neutrality– Governor Inslee Signed 2282 on March 5, 2018

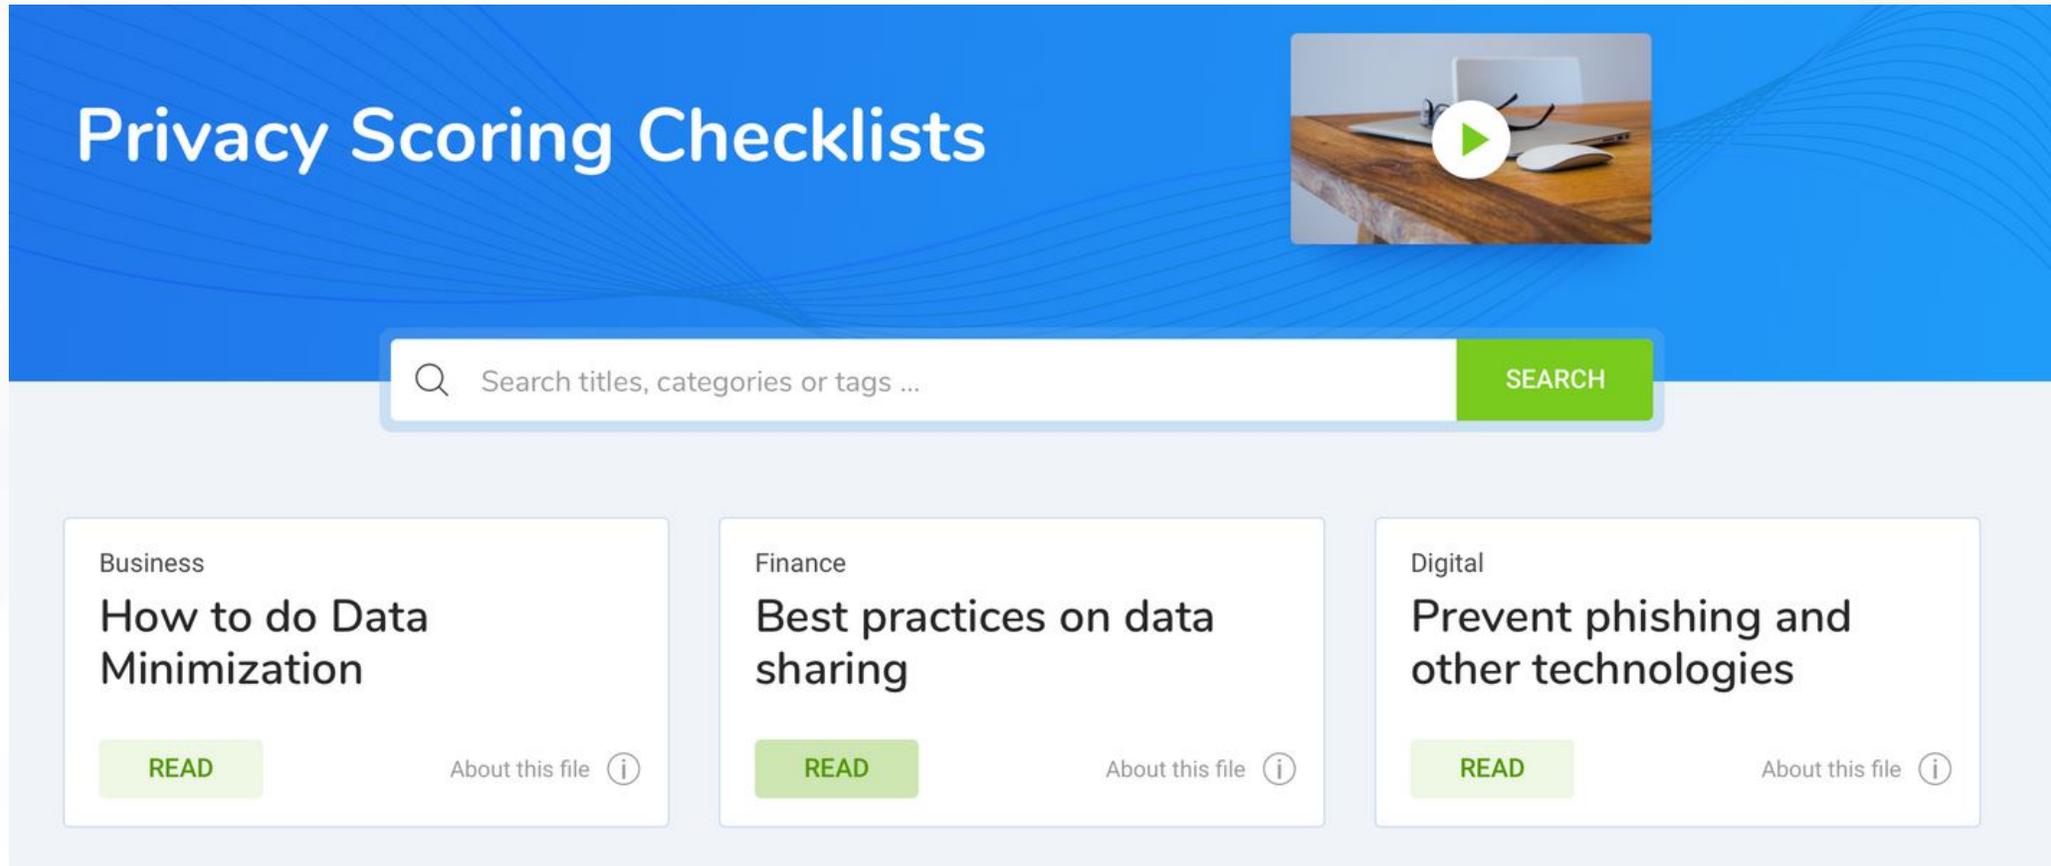

March 13, 2018

42

Privacy Scoring

- New Initiative funded by Hewlett Foundation
- Designed to help with best practices + training
- Benefits state and local government

The screenshot shows a website interface for 'Privacy Scoring Checklists'. At the top, there is a blue header with the title 'Privacy Scoring Checklists' in white text. To the right of the title is a video player thumbnail showing a desk with a laptop and a play button icon. Below the header is a search bar with the placeholder text 'Search titles, categories or tags ...' and a green 'SEARCH' button. The main content area features three white cards, each representing a checklist:

- Business**: 'How to do Data Minimization'. Includes a green 'READ' button and an 'About this file' link with an information icon.
- Finance**: 'Best practices on data sharing'. Includes a green 'READ' button and an 'About this file' link with an information icon.
- Digital**: 'Prevent phishing and other technologies'. Includes a green 'READ' button and an 'About this file' link with an information icon.

Training and Materials

- Agencies are our clients
- We need funding to do more comprehensive training
- Strategy has been to leverage grants and OCIO resources
- As data becomes more important, the need for data protection skills will become mission critical

Reaching the public

- Libraries are our best venue
 - Keeping it Private
 - So you think you've been Hacked
 - Data Equity for Main Street – open data in libraries

March 13, 2018

Privacy in the Digital Age

Wednesday
March 14
6:30 pm
Free & all welcome

Join Alex Alben, the Chief Privacy Officer of Washington State, to learn about digital privacy. As one of only five Chief Privacy Officers in the country, Alex has initiated innovative programs for enhanced privacy training and consumer education.
