Recognition for Washington

Announcement

10/11/2018

4

Digital State Survey Results

- Washington received an **A-** grade
 - Conducted every other year
 - Sustains 2016 grade
 - Measures overall use of technology to improve services, increase capacity, streamline operations and achieve key policy goals
 - Washington remains in upper 25% of states
- Top 5 in the nation in two categories
 - #3 in Transportation
 - #5 in Public Safety

NASCIO Awards Finalist - Reboot of TBM Program

- What we did:
 - REBOOT - Technology Business Management (TBM) Program in 2016
 - Adopted standards, templates, streamline process
 - 45 program agencies at 100% reporting compliance
 - Results:
 - Transparency into IT Investments
 - Improved reporting
 - Mature agencies using data to support decision making
- Washington is recognized leader in public sector
- Link to award
 - <https://www.nascio.org/Newsroom>

Marijuana Traceability Project

Topics

- Overview of project
- Status
 - Scope
 - Schedule
 - Budget
- Independent Verification and Validation Gartner Report
 - Recommendations
 - LCB Action Items
- QA Report
- January 2018 TSB Follow up
- Q and A

10/11/2018

Traceability Project Overview

- The state's first contracted traceability system, BioTrack THC, went live in 2013
 - The system tracked product from seedling to sale
 - System did not meet OCIO standards
 - System was not scalable or configurable
 - Maturing marketplace outgrew the capabilities of former system
- The LCB unsuccessfully attempted to secure a contract extension with BioTrack THC
 - Faced a “burning platform” with an Oct. 31, 2017 contract expiration.
- In 2017 the agency rebid the traceability system, which was awarded to MJ Freeway, who hosts Leaf Data Systems
 - LCB signed a contract in mid-July 2017 to implement a new system that had to be in place by October 31, 2017
 - Typically, development takes 12-18 months for a project of this complexity
- The Leaf system was implemented February 1, 2018, and is scheduled to be fully implemented by Dec. 31, 2018
 - As it operates today, the system has known defects that are being addressed in releases scheduled for November and December.
 - Tickets are tied to all issues identified in Leaf. Those tickets are part of the upcoming scheduled releases.
 - Vendor management has improved significantly. The new contract has incentives for producing releases earlier than scheduled and liquidated damages for missed deadlines.
 - The independent QA consultant noted the across-the-board improvements in its August report by reducing all “high risk” areas to “moderate risk” or “low risk.”

Marijuana Traceability Status

Current Scope Status

- Scope remained relatively constant (six CRs approved totaling \$15,657)
- Release 1.35.6 successfully implemented August 27, 2018

Budget

- Changes from IT Pool Technology budget increased by \$528,467 to \$3,063,751

Timeline

- Changes from IT Pool Technology schedule increased by 6.7 months from 08/10/2018 to 02/28/2019
 - Release 1.1 is due on 11/05/2018
 - Release 1.2 is due 12/18/2018
 - Release 1.3 is due 12/31/2018

Gartner Assessment

Independent Verification and Validation

- As required by the Office of the Chief Information Officer, LCB initiated the process to conduct an Independent Validation and Verification (IV&V)
- Gartner was engaged to perform an independent assessment of the Leaf development process and implications in the field
 - Original period of performance May 31, 2018 - June 30, 2018
 - No cost extension period of performance May 31, 2018 – August 31, 2018
- The IV&V was a focused evaluation around **Solution Development & Implementation** which consisted of assessment in six areas:
 - Business Process/Requirements
 - Architecture & Design
 - Interfaces/Integration
 - Development & Configuration
 - Testing
 - Deployment

Gartner Executive Summary

Gartner Identified Areas Going Well...

Dedication

- MJ Freeway stated that they remain dedicated to the State and the project.
- The team is transparent and seems willing to make required changes so the project can move forward in a positive manner.
- The Washington State team has the same dedication to the integrators and licensees as MJ Freeway does to the state.

Improved Communication

- Communications between the State team and the MJ Freeway team has improved since staffing changes occurred.

Defined Roles

- The roles of the State teams are better defined and the different resources appear willing to the support the project moving forward.

Workarounds

- Contingency spreadsheets provided a fair and simple way for reporting by licensees.

Gartner Going Forward Recommendations

After completing the remaining areas of the risk assessment, Gartner recommended WSLCB proceed with two go-forward options...

1. Consider Cancelling the Project

- LCB is preparing contingencies in case the vendor is unable to meet contract terms

2. Implement Remediation Plan

- LCB has drafted and is currently implementing remediation plan (next slides)

Remediation and Response

Software Development

- **Issue:** Commercial Off the Shelf (COTS) systems do not exist in the immature marijuana regulatory market and customization requirements of the system were underestimated.
- **Remediation:** Further define MJ Freeway's services and engineering development to improve quality of the Leaf solution.

What LCB Has Done

- Created configuration and release plans that outline specific build methodologies, quality controls and acceptance criteria.
- Conducted lessons learned
- Published weekly defect and status reports for third-party integrators
- Prioritized backlog
- Subject matter experts (SME) are engaged in elicitation to understand downstream impacts
- Product owners review acceptance criteria and release plans

What LCB Will Do

- Review existing plans to identify gaps and update with detailed expectations
- Continue to enforce controls

Remediation and Response

Testing

- **Issue:** The state went live with a solution that would have failed typical tests
- **Remediation:** Enhance testing processes and follow existing best practices

What LCB Has Done

- Updated test plan defines entrance and exit criteria
- Regression testing for each new release
- Code was rejected if non-cosmetic defects are found
- Triage team reviewed all found defects
- User story acceptance criteria designed by SMEs as exit criteria for release
- Triage process assigns severity and priority to each user story or defect
- All integrators are given 2-5 days to test releases

What LCB Will Do

- Require MJ Freeway to conduct a review of their testing process and implementation improvements
- Publish weekly production release metrics including defects

Remediation and Response

Deployment

- **Issue:** The system was not mature enough for launch on Feb. 1, 2018
- **Remediation:** Create a predictable release plan focused on stability

What LCB Has Done

- Configuration, release and test plans are in place and closely monitored

What LCB Will Do

- Ensure plans for compliance are correct and correct deficiencies
- Develop a risk log for each release and ensure risks are accepted or mitigated for each release
- Executive sponsor will be final approver on all releases

Remediation and Response

Architecture and Design

- **Issue:** A lack of API documentation and best practice information created road blocks for consuming web services and has caused problems for API consumers.
- **Remediation:** Develop and disseminate API supporting documentation for third party consumers

What LCB Has Done

- API documentation is tested for accuracy prior to release and is used as a decision gate
- API documentation is available in the application and on the LCB website
- Compared CA, OR, NV API documentation
- Documented and published security requirements in contract
- Contract contains robust and detailed security requirements that exceed OCIO standards
- Conducted third-partied vulnerability assessment prior to launch

What LCB Will Do

- Enhance gap analysis and testing to ensure security requirements are met

Remediation and Response

Business Process/ Requirements

- **Issue:** Intent for Leaf as a “compliance,” not “inventory management,” system was not fully understood by all stakeholders. Subsequently, adoption of the deployed system was negatively impacted by the perception that external user needs were not accommodated.
- **Remediation:** Ensure internal and external stakeholders have a common understanding

LCB Has Done

- Initiated hiring an Organizational Change Management (OCM) Consultant

LCB Will Do

- Develop and implement and OCM plan to assist internal and external stakeholders

Marijuana Traceability Project

Follow Up to January TSB Meeting

Commercial Integrations with Leaf

- Initiated integrator certification and decertification program research
- Analyzed other state programs
 - Limited to simple API validation
- Consulted AG
- Consulted OCIO
 - Confirmed that integrators are subject to OCIO 141.10 (security policy)
- Developing workgroup with integrator, research and licensee representation
- Hiring Integrator Program Specialist that will be liaison with integrators and lead effort

Q and A

Zero-Based Budget Review – OCIO Impacts

Discussion

10/11/2018

22

Background

Mandated by Legislature in last biennial budget

Evaluated WaTech service areas , included most OCIO programs (based on funding code)

Six criteria established Ability to Execute and Value Generation

Resulted in rating to discontinue, contain, improve or expand

Key Recommendations

Expand

- Geospatial Governance
- Open Data

Improve

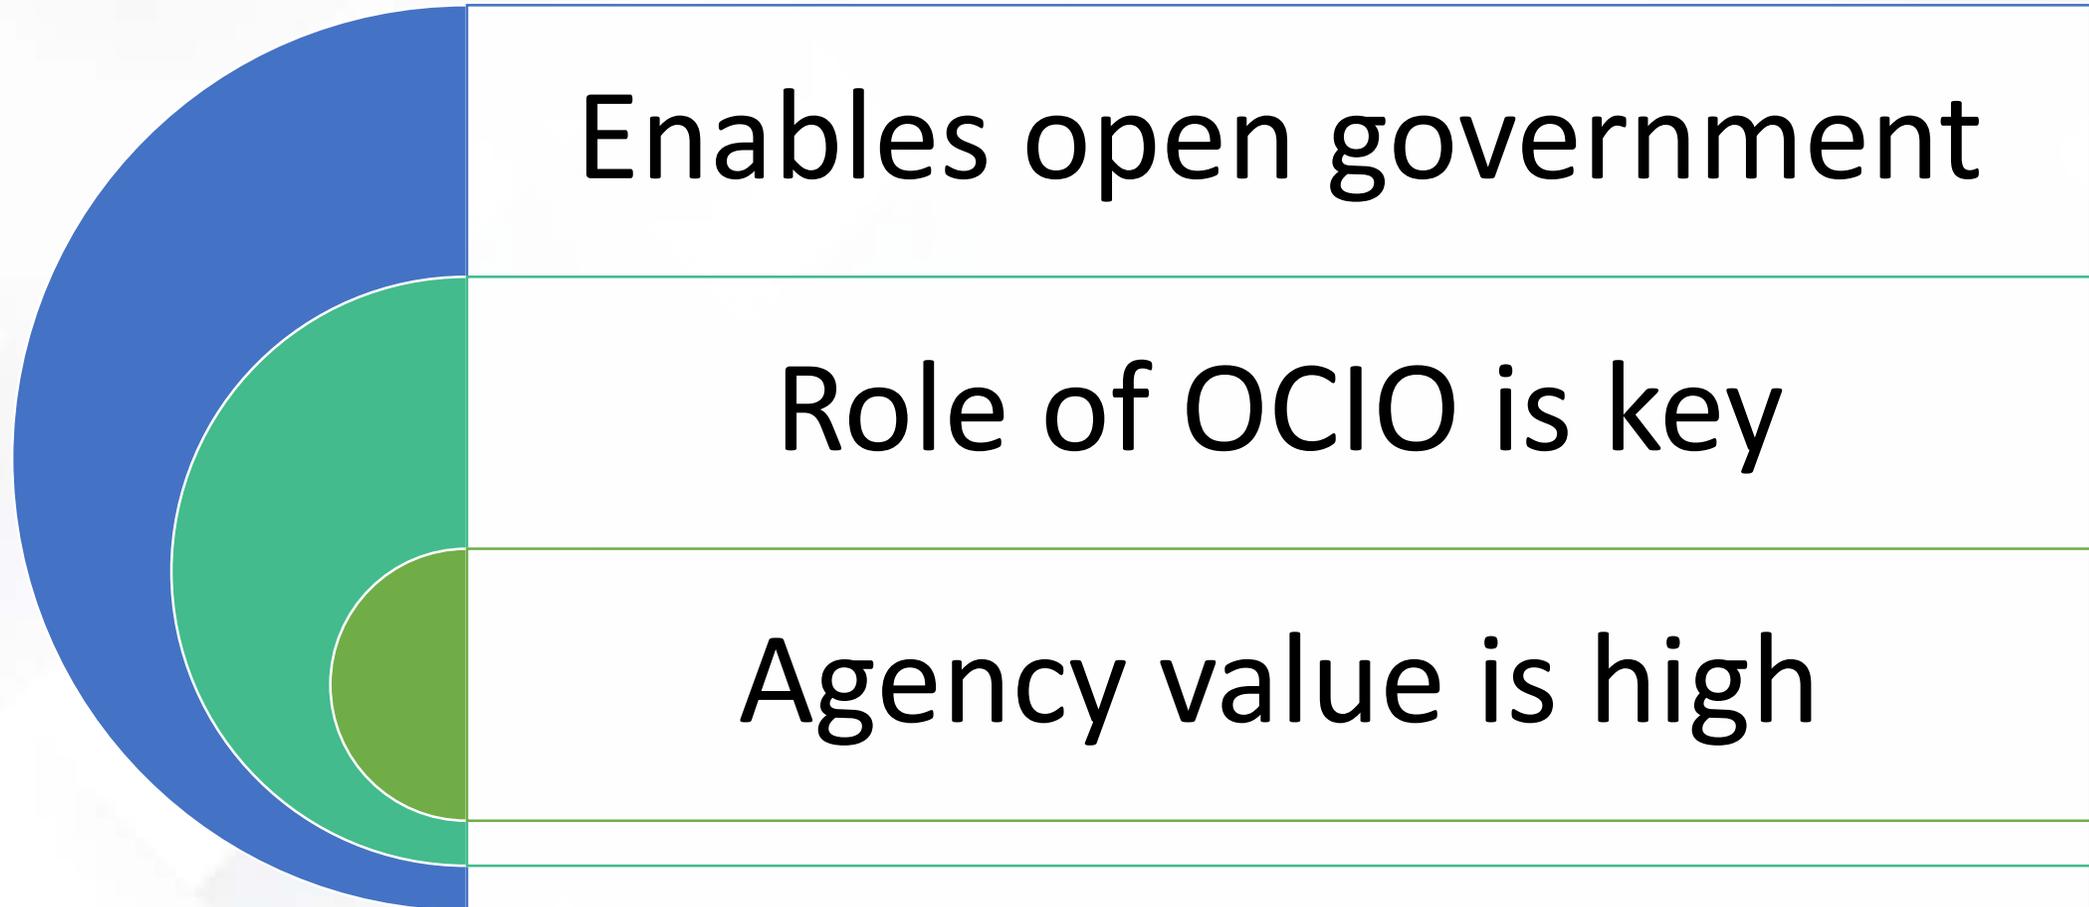

- Policy & Architecture
- Oversight
- Technology Business Mgmt
- Geospatial Portal & Imagery
- WAMAS
- Security Services

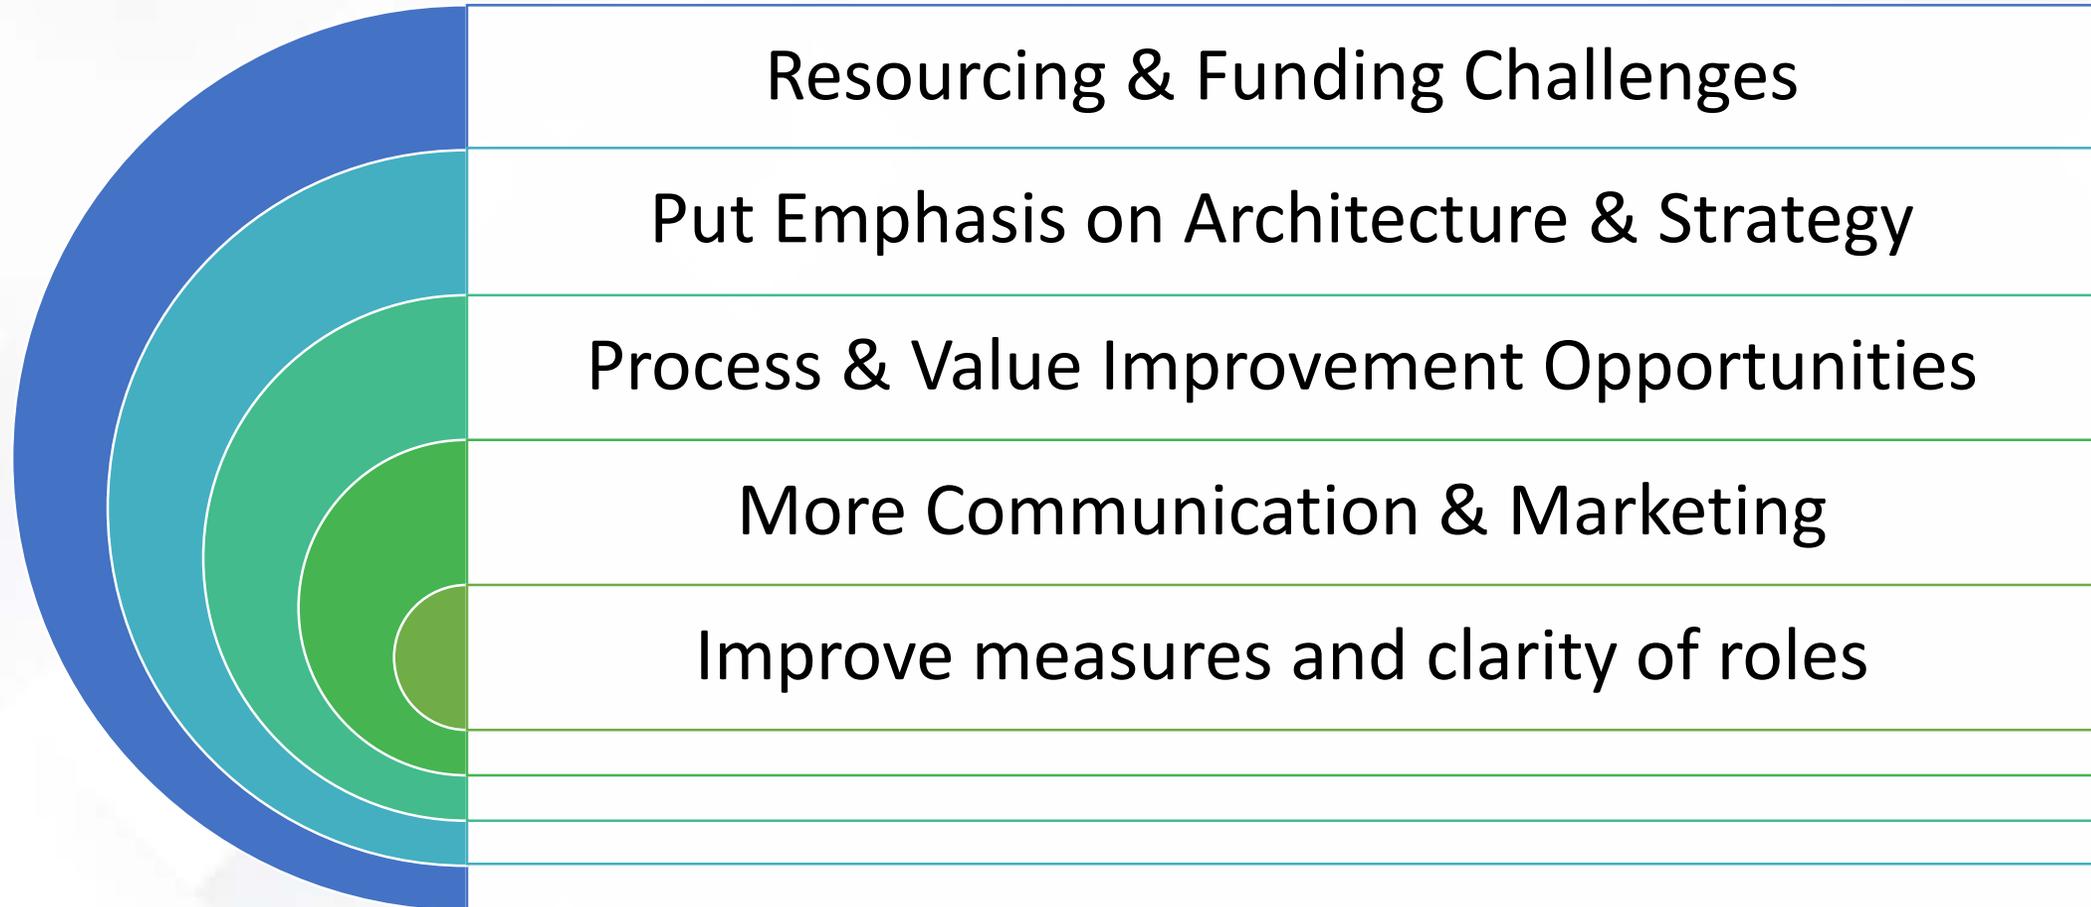

Discontinue

- One Net

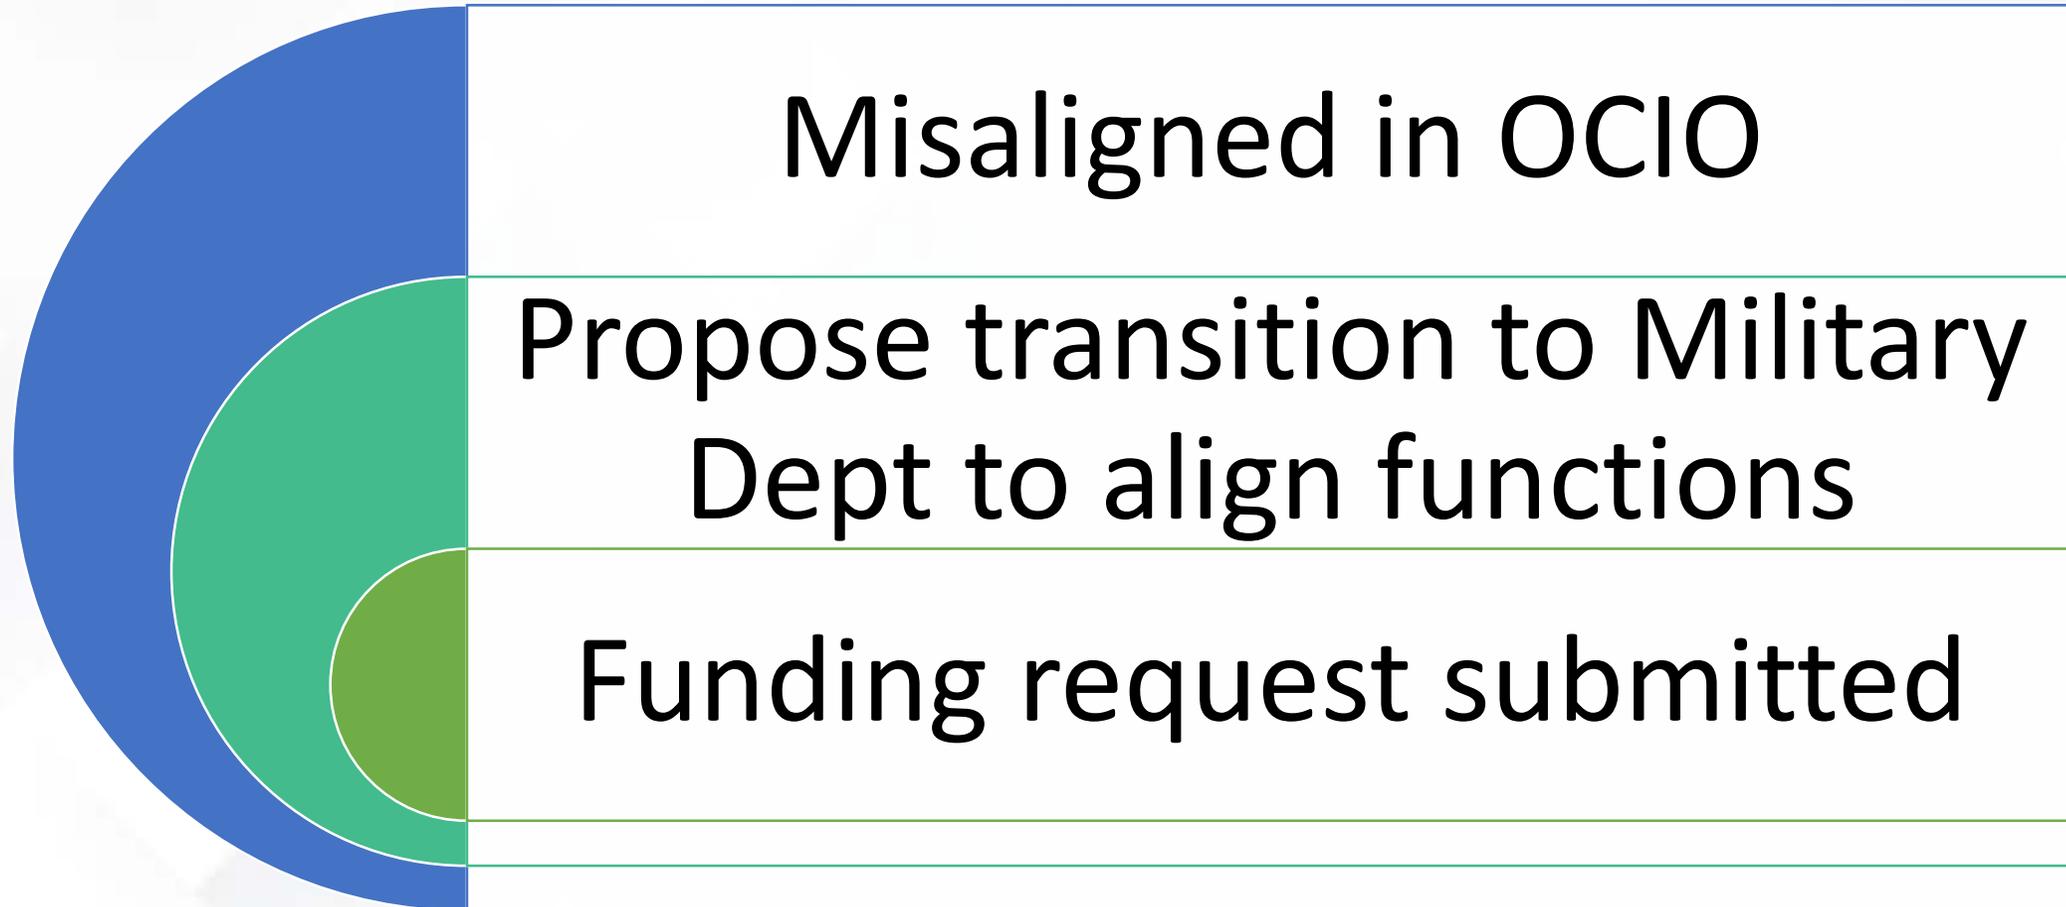

Basis for Expand Recommendations

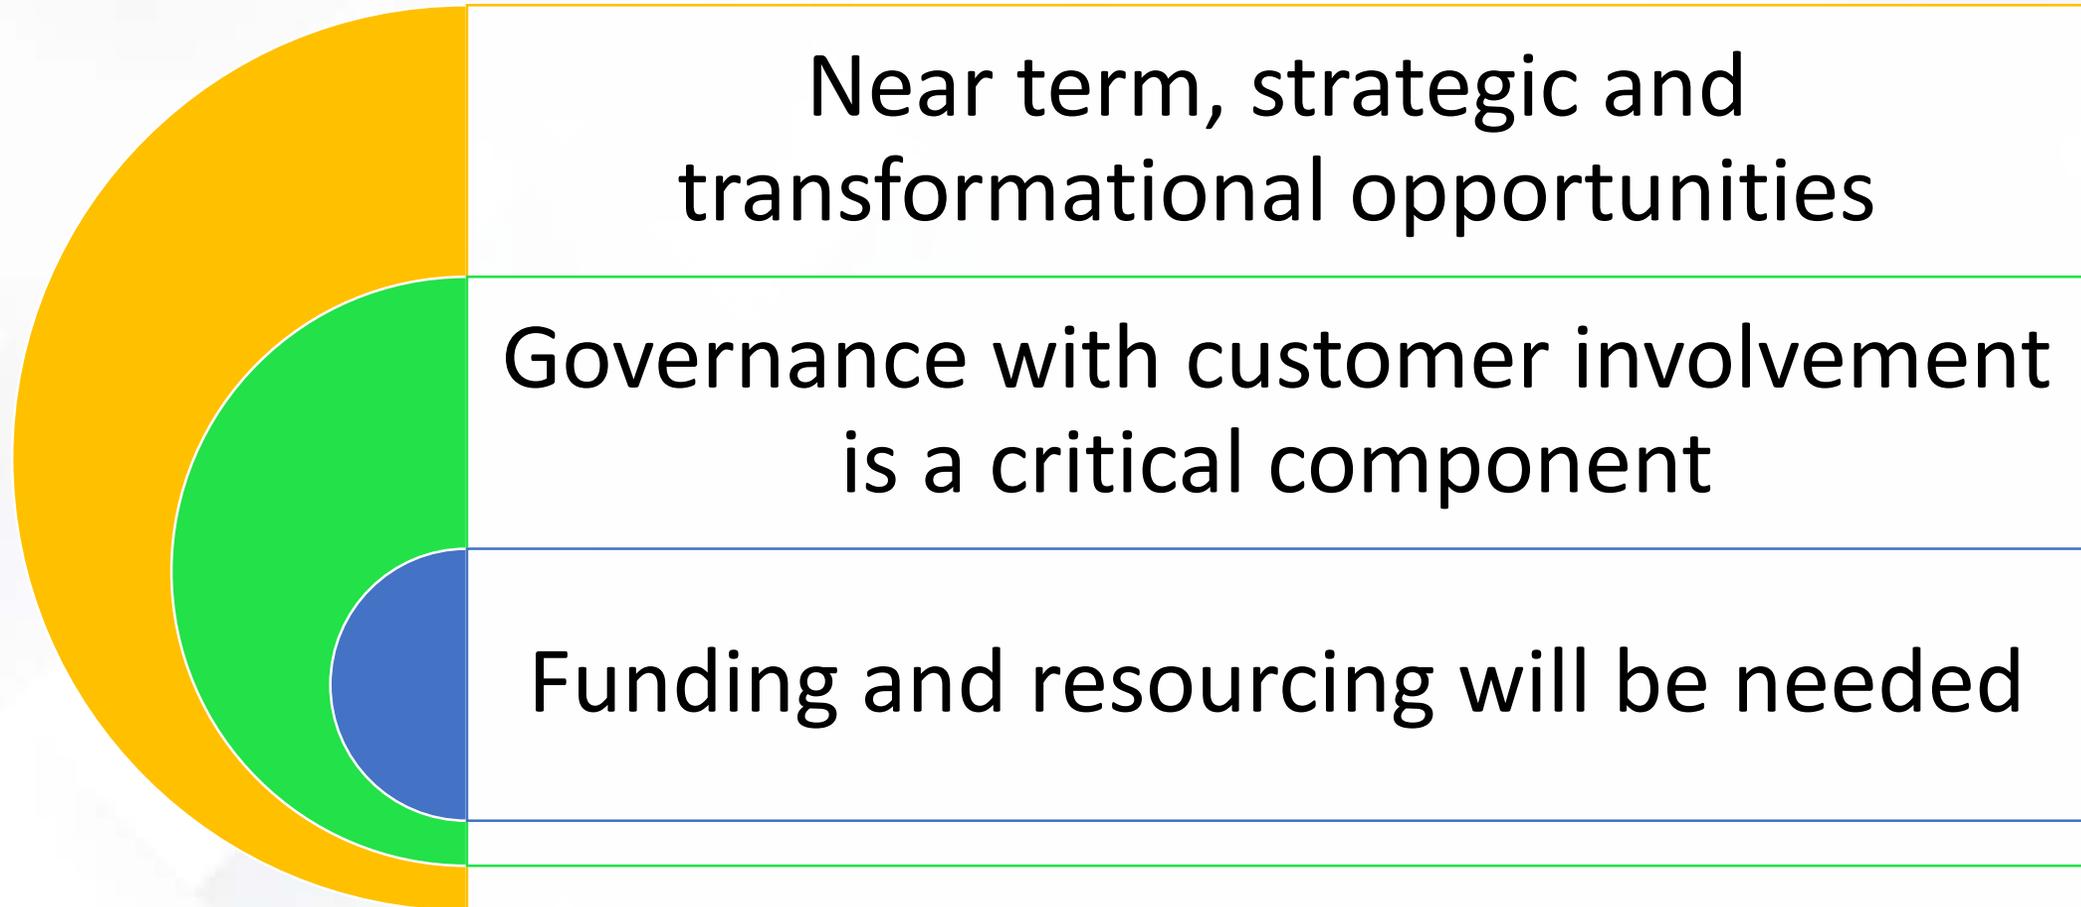

Basis For Improve Recommendations

Basis for Discontinue Recommendation

Impacts to WaTech Services

2013-2017 IT Biennial Report

Discussion / Feedback

10/11/2018

29

Background

Guided by RCW 43.105.220

Strategic Information Technology Plan

- Establishes statewide mission, goals and objectives for use of IT
- Goals for electronic access to records, information and services
- Plan in accord with established standards and policies
- Seek advise of the TSB in plan development

Biennial State IT Performance Report

- Based on agencies IT portfolio
- Analysis and evaluation of performance relating to IT
- Assessment of progress towards implementing the strategic plan
- Analysis on success or failure of major IT projects

2013-2017 Report Foundation

Strategic Information Technology Plan

Used to guide movement forward

Multiple versions and structures

Retained emphasis across versions

IT Portfolio

Cornerstone is Portfolio Management program

Several component parts

Less structured data capture methodology

Interesting Findings

Assessment - Implementing Strategic Plan

Supporting access to public information

Enabling citizen two-way access to public records and services

Office of Privacy and Data Protection

- Increased training on managing/protecting citizen data

Office of Cyber Security

- Responding to intensified threats and cyberattacks

Updates to statewide technology policies

- Support for enterprise architecture

Addressing 'silver tsunami' – IT job class study

Evaluation of IT Performance

Increased emphasis data center migration

- 19 agencies with active migration
- 27 agencies developing migration plans

Progress on accessibility

- 98% of agency have accessibility coordinator

Improved investment transparency

- Ability to benchmark across government and private sectors

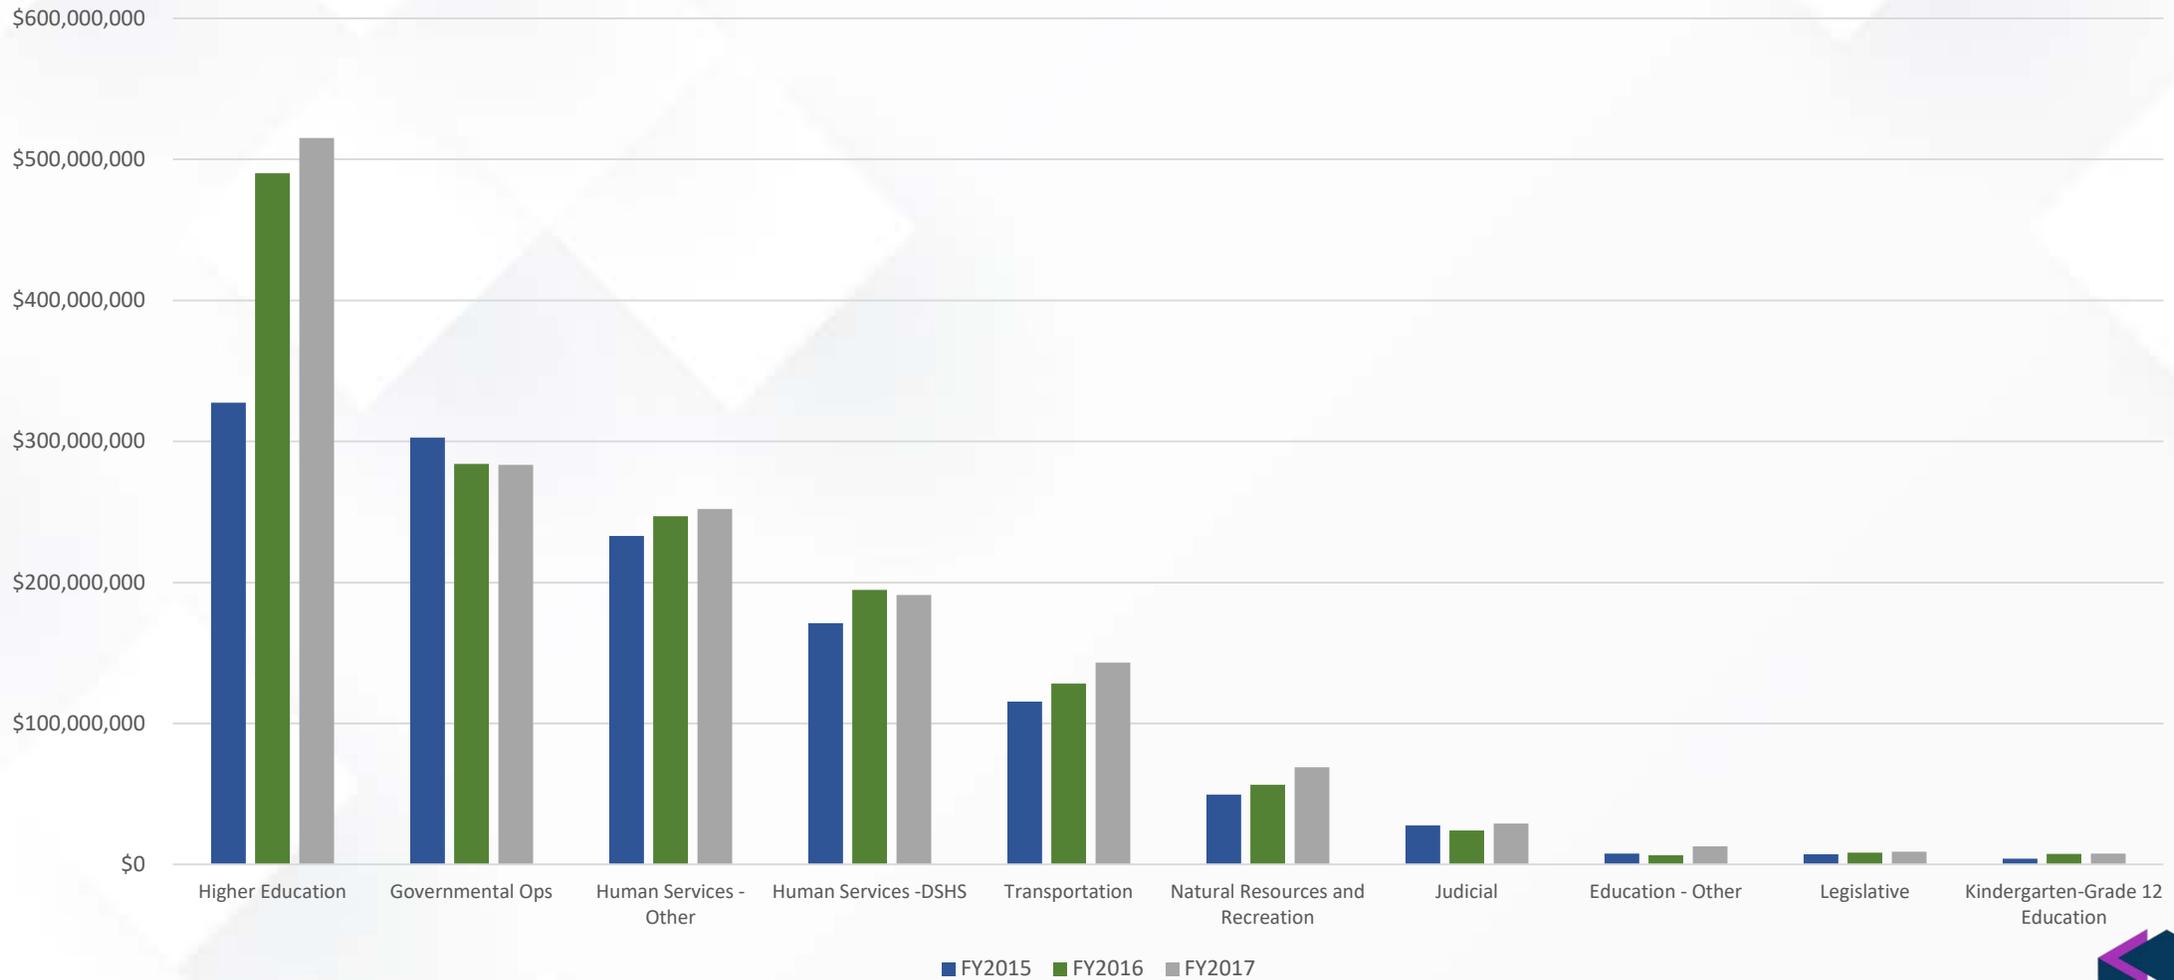

IT Investment Profile

2016-2017 STATE IT INVESTMENT				
Cost Pool	2016	2017	2016-2017 Total	% of Spend
Internal Labor	\$546,125,618	\$603,515,416	\$1,149,641,035	39%
External Labor	\$199,193,790	\$185,706,560	\$384,900,350	13%
Outside Services	\$261,370,920	\$265,227,419	\$526,598,339	18%
Hardware	\$170,892,325	\$189,613,823	\$360,506,148	12%
Software	\$99,017,739	\$116,420,937	\$215,438,675	7%
Other	\$71,195,446	\$59,418,066	\$130,613,512	4%
Telecom	\$59,074,968	\$50,507,511	\$109,582,479	4%
Facilities & Power	\$40,540,044	\$42,293,730	\$82,833,775	3%
Total	\$1,447,410,850	\$1,512,703,462	\$2,960,114,312	100%

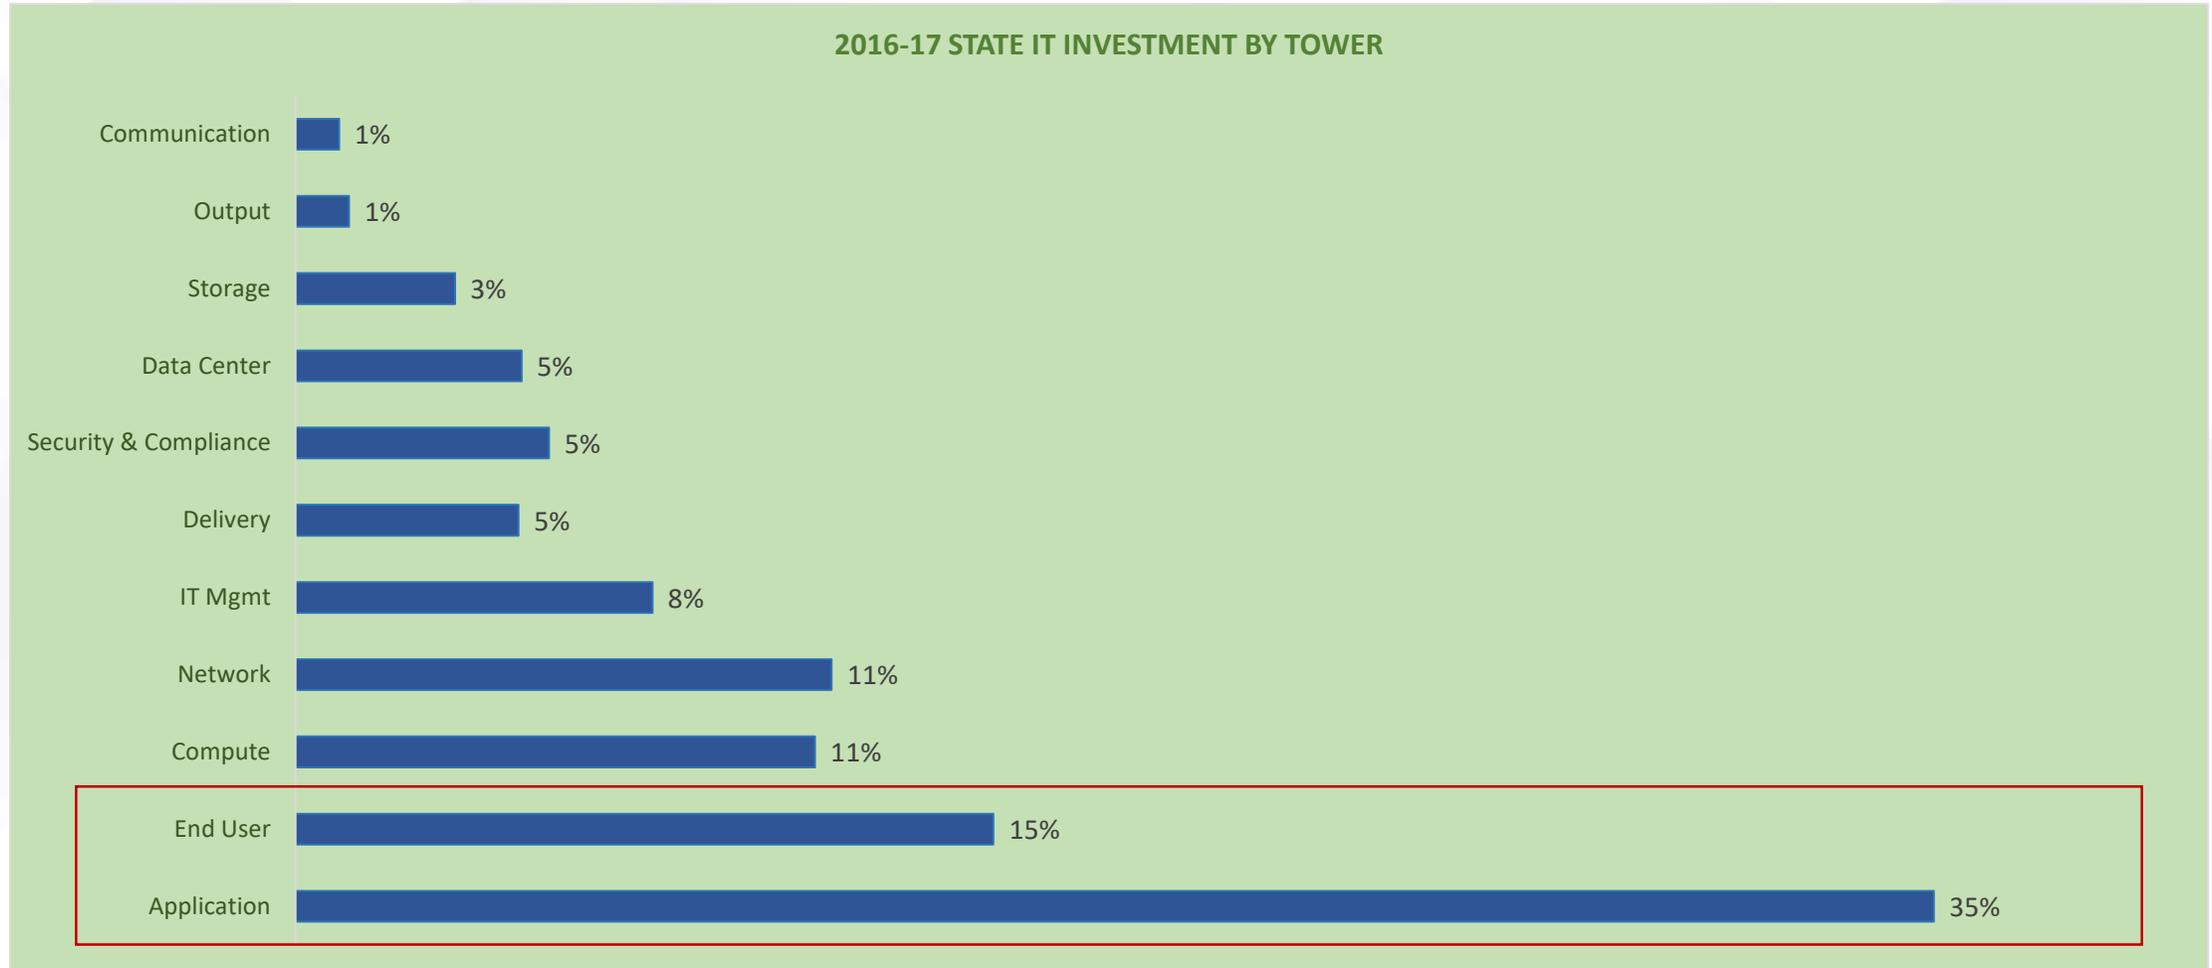

- *Significant increase attributed higher education*

IT Investment by Government Function

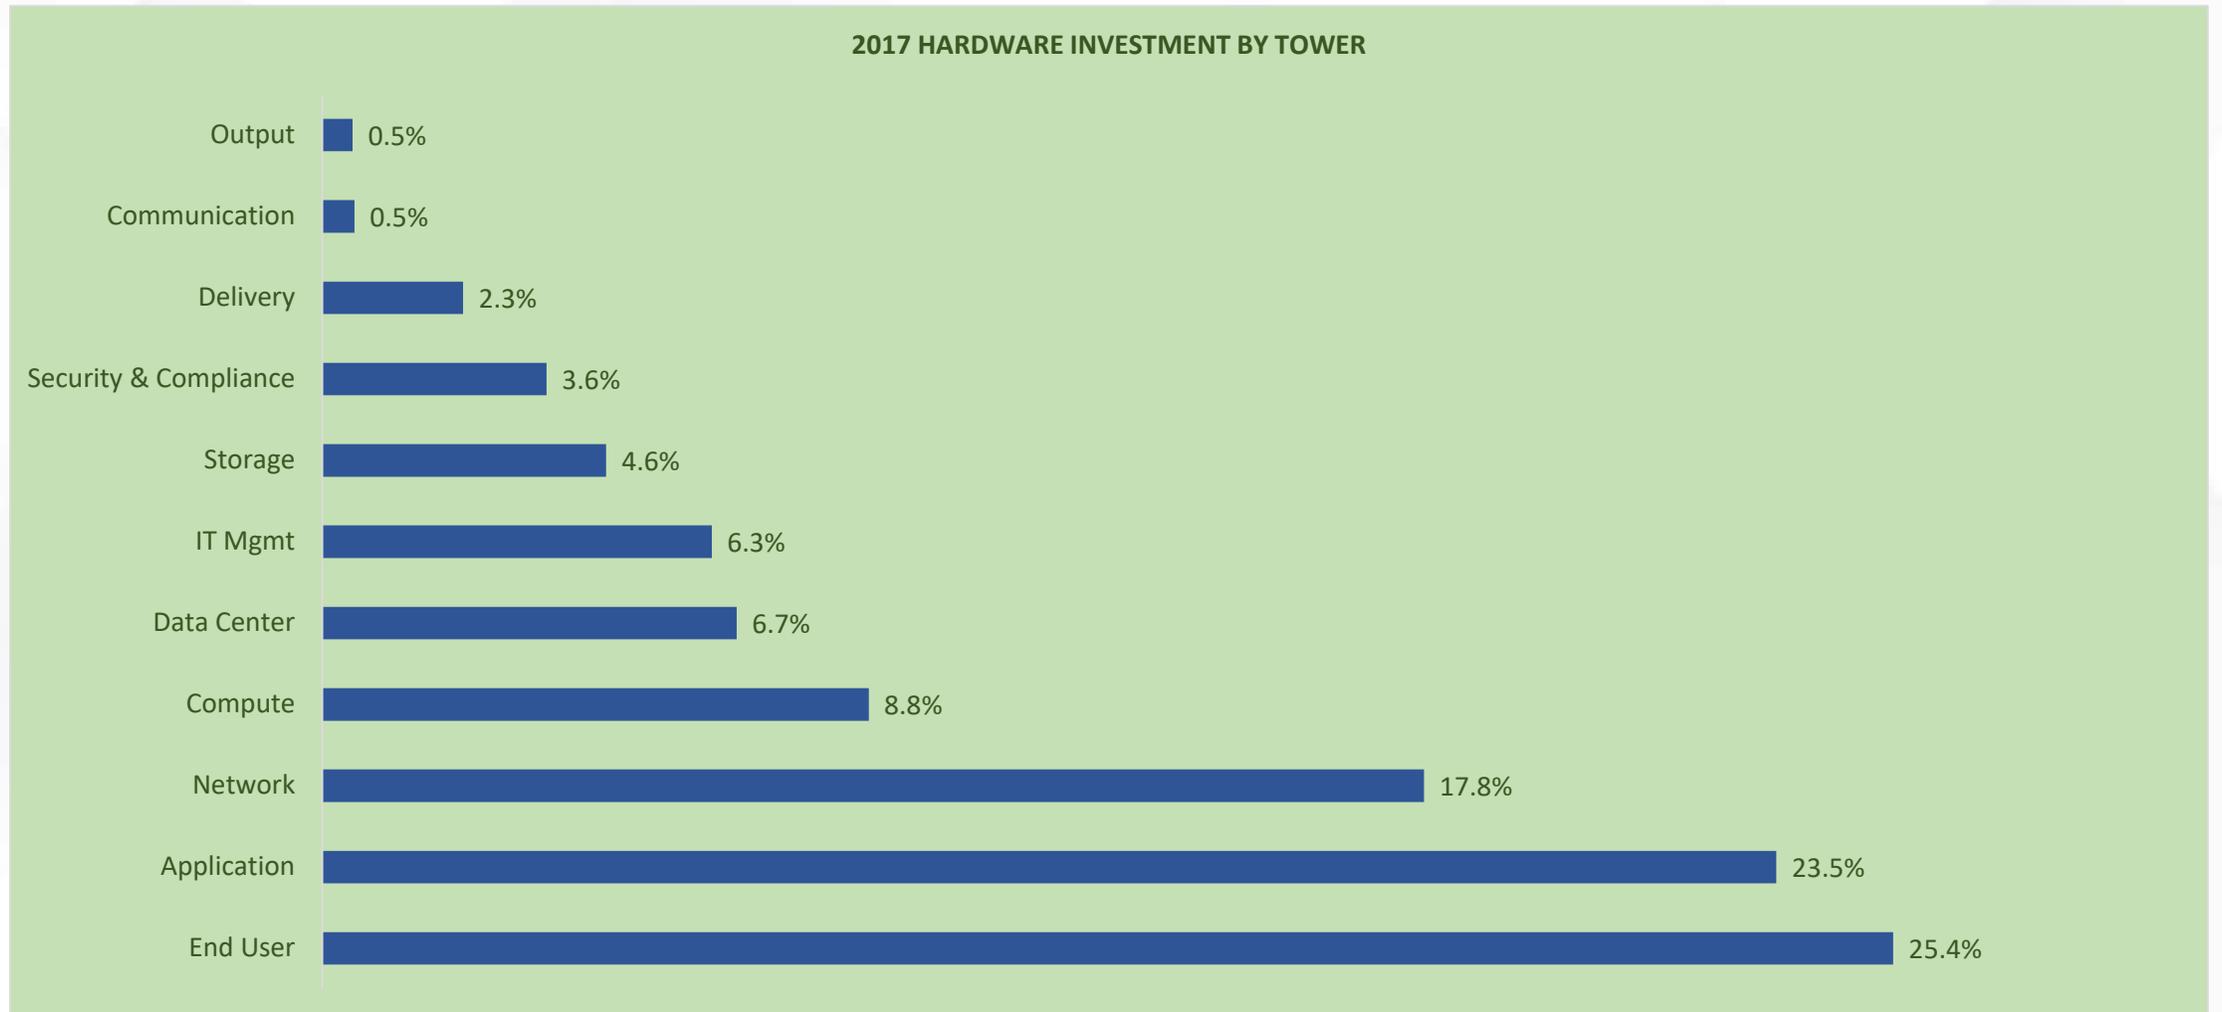

IT SPEND BY GOVERNMENT FUNCTION

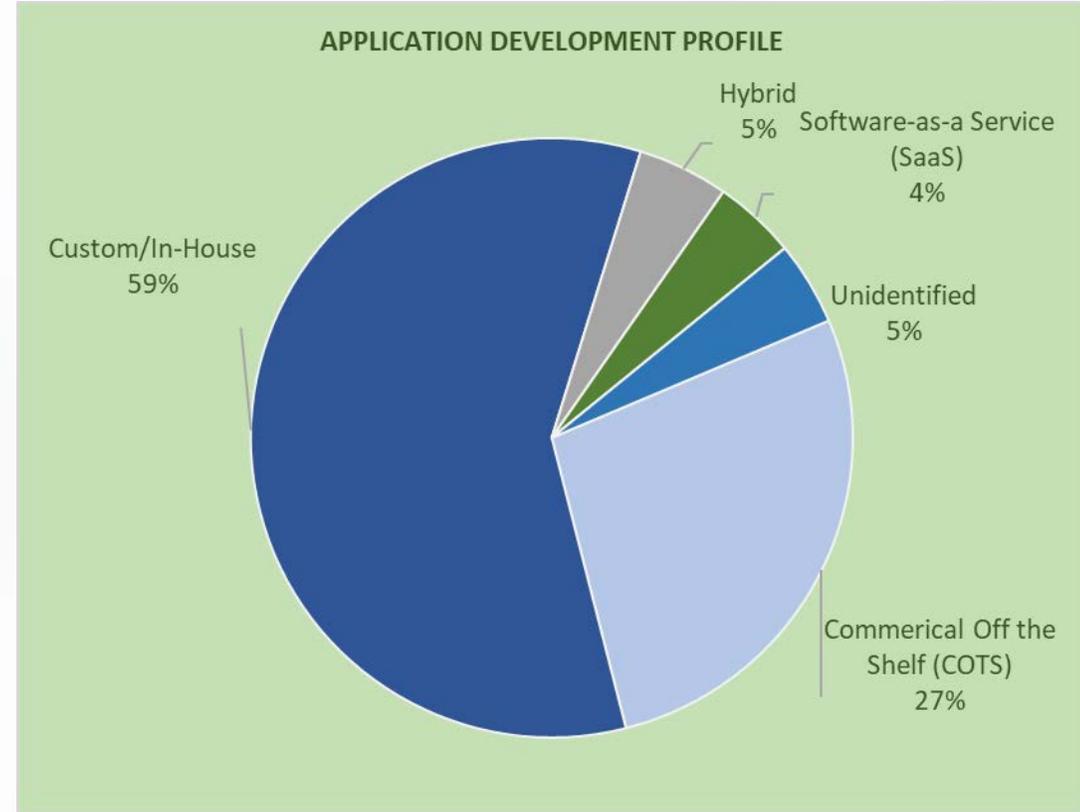

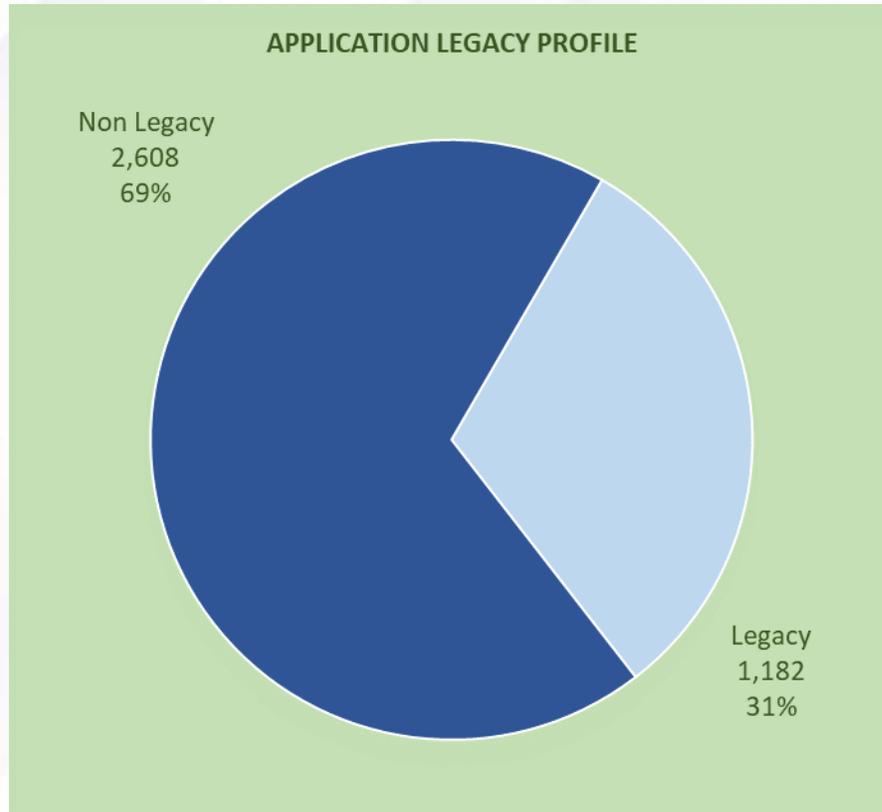

Investment by Technology Tower

Hardware Profile

Application Profile

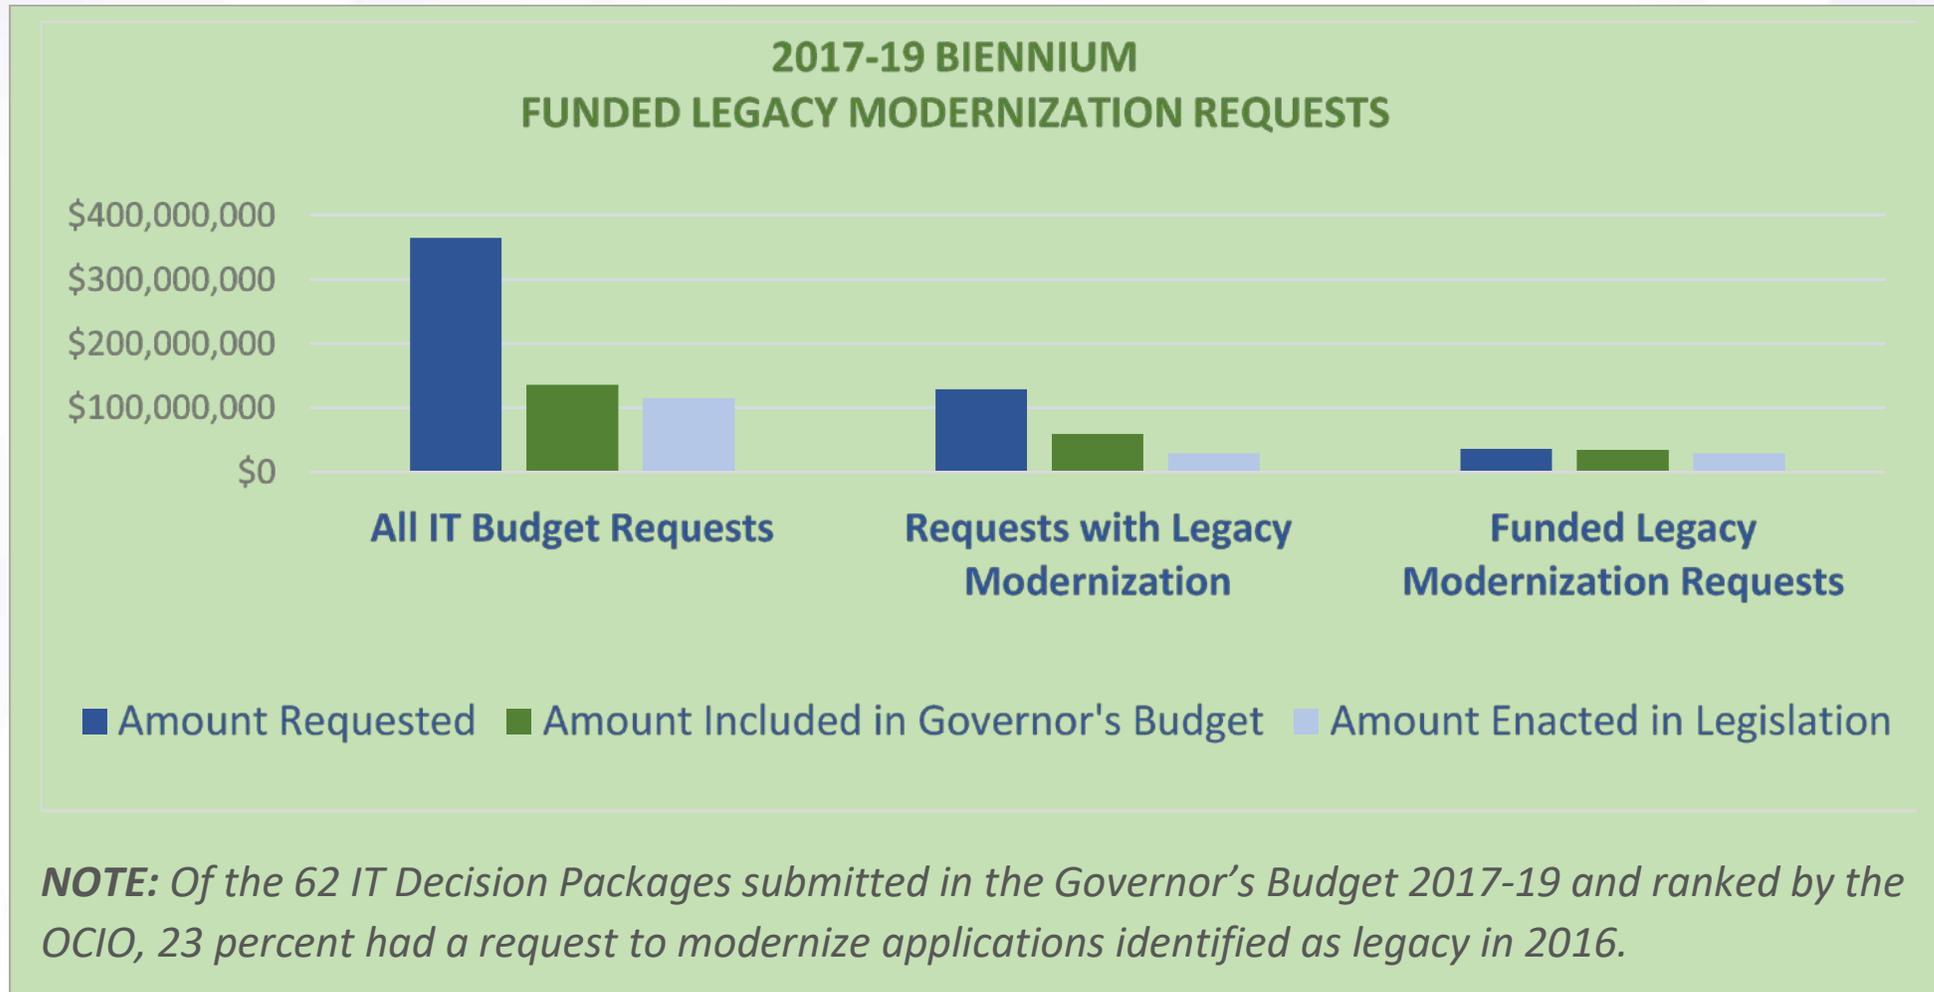

- *65% of “custom developed-legacy” apps are mission critical/business essential*

2014-17 Modernization Projects - Closed

AGENCY NAME	PROJECT NAME	BUDGETED
Department of Ecology	Attendance Tracking Replacement System (eTime)	\$2,211,213
Department of Fish and Wildlife	Washington Internet Licensing Database System (WILD)	\$3,800,000
Employment Security Department	Unemployment Tax and Benefit (UTAB) System	\$43,662,000
Employment Security Department	CallTech (UI Claims Center Tech Upgrade)	\$3,848,849
Department of Labor & Industries	Crime Victims Case Management (CVCMS)	\$1,652,254
Department of Labor & Industries	Mobile Inspections	\$3,548,000
Department of Labor & Industries	My L&I	\$3,920,560
Department of Labor & Industries	Prevailing Wage Program	\$1,130,000
Department of Labor & Industries	Self-Insurance Risk Analysis System (SIRAS)	\$2,472,000
Department of Licensing	American Association of Motor Vehicle Administrators (AAMVA) modernization	\$800,000
Public Disclosure Commission	Customer Service Case Management System	\$99,950
Department of Social and Health Services	Critical Incident Tracking System (CITS)	\$15,067,016
Washington State Patrol	A Central Computerized Enforcement Service System (ACCESS) Replacement Project	\$2,390,296

TOTAL BUDGETED AMOUNT \$84,602,138

Funding Legacy Modernization Requests

Analysis Major Projects

2014-2017 PROJECT OVERSIGHT

- 143 Projects: \$1.09 Billion Budgeted
 - Includes 40 IT Investment Pool Projects
- Project Status as of 2017
 - 75 Closed
 - 56 Still Active
 - 9 Cancelled
 - 3 On hold
- Project Status at Close of Project
 - 75% Green
 - 21% Yellow
 - 4% Red

Improvement Activities

- Using data to inform future process improvements
- Developed new risk/severity assessment tool
- Update to quality assurance standards
- Analyzed critical success factors based on lessons learned

Other Findings

2017-2021 IT Strategic Plan

10/11/2018

State of Washington

Enterprise Technology Strategic Plan

Public facing services & information tailored to every constituent & to improve the effectiveness of staff, processes & systems.

Information technology (IT) is seen as a **strategic & dependable** partner to business leadership.

We **operate** in a way that builds trust with our authorizing environment & the customers we serve.

We believe **true innovation** comes from thoughtful experimentation & incremental development.

Efficient & Effective Government

Create opportunities for operational efficiency & **improve** constituent access to services

- Consolidate common technology & services
- Pursue brokered service options
- Maximize state's buying power
- Create constituent focused portals
- Develop accessible & responsive designs
- Increase access to open data

Accountable IT Management

Develop accountability & transparency while managing with **integrity**

- Evolve portfolio management and technology business management to support decision making
- Expand transparency dashboard
- Improve visibility into alignment
- Strengthen business driven governance
- Continuously improve technology lifecycle management
- Mature project management & related practices

IT Workforce

Recruit, develop & retain exceptional technology staff & leaders

- Create & maintain a competitive job classification structure
- Create an enterprise workforce development strategy
- Re-imagine management practices to foster employee empowerment & engagement
- Create mobility friendly facilities
- Implement mobility friendly work practices
- Enhance mobile device management

Enterprise Architecture

Identify strategic technology investments to support common business needs/functions

- Build EA program and discipline across the state or business "ecosystems"
- Identify common business practices that can be supported by shared solutions
- Increase capacity to manage & share information
- Modernize infrastructure and applications

Security & Privacy

Find & stop security risks while **increasing** privacy awareness

- Invest in top cybersecurity talent
- Proactively assess application security
- Continuously improve state defenses
- Improve policy & standards
- Build capacity for Washingtonians to protect their privacy
- Provide agencies with tools to improve privacy practices

IT Biennial Report – Recognizing Gaps

Why 2013-15 included with 2015-17

- 2013-15 Biennium Report not prioritized
- Merge of OCIO with CTS was underway
- Competing areas of focus overextended already constrained resources

Reporting gaps discovered

- Inadequate data capture
- Limited analysis
- Missing performance metrics
- Manual business processes

2017-19 Biennial Activities to Close the Gaps

OCIO Commitment

- Renew/update statewide IT Portfolio Management model
- Expand data capture in multiple areas
- Improve business processes to capture agency portfolio data
- Increase focus on Performance Management
- Broaden and strengthen analysis
- Heighten emphasis on timely reporting for 2017-19 Biennium

Activities in Progress

Portfolio Management Model - Components

Governance and Compliance

- Process/structure for decision making
- Prioritization and balancing alignment

Strategy/Strategic Plan

- Enterprise Architecture
- Key performance criteria
- Goals, definitions and categories

Assessment

- Inventories
- Categorize, evaluate and select
- Resource analysis and availability
- Capacity
- Communicate adjustments

Monitoring and Control

- Monitor performance indicators
- Management portfolio risk
- Monitor and report on IT Investments
- Project Oversight

Performance, Results, Outcomes

- Biennial Report
- IT Spend Report
- Track and report Outcomes
- Lessons learned

Performance Reporting Emphasis

- Data Capture and Analysis
 - IT Project Assessment (ITPA)
 - IT Project Dashboard
 - Major IT Project - Lessons Learned
- Zero-Based Budget Report (ZBBR) recommendations
- Expanded IT Investment reporting
- Legacy application trending

Project Oversight Improvements

Discussion

10/11/2018

51

Target Areas

Overall Approval and Oversight Process

- Phasing and Gating
- Evaluate opportunities to engage TSB differently

Role & Value of Quality Assurance

- More QA community engagement
- Revisit policies and standards

Capture, Analysis & Redeployment of Lessons Learned

- Vendor Management
- Organizational Change Mgmt
- Sharing Lessons Learned

Improve Project Planning, Management and Readiness

- Shared definition of core Project Mgmt Plan
- Importance of feasibility studies
- Small agency challenges

Internal Processes & Communications

- Evaluate processes for consistency and efficiency as opportunities arise
- Improve communications
- Improve performance tracking

Incorporate Architecture

- Increase consultations with projects

Discussion

What are best ways to engage TSB?

Public Comment
